

MEDICAL MICROBIOLOGY MASTER PROGRAM OUTCOMES

PO1- Gains up-to-date evidence-based knowledge and skills in the field of medical microbiology.

PO2- Uses evidence-based knowledge for research in the field of medical microbiology

PO3- Develops scientific projects.

PO4- Analyzes the scientific data obtained in the literature review.

PO5- Uses statistical methods in scientific studies and interprets statistical data.

PO6- Becomes aware of ethical values in scientific studies.

PO7- Can use various sources to reach information.

PO8- Gains knowledge about the use of necessary devices and tools.

PO9- Complies with biosafety rules in the laboratory.

PO10- Have the awareness of lifelong learning.

PO11- Makes scientific articles and presentations in national and international field.

PO12- Becomes a researcher in national and international scientific studies, including interdisciplinary studie.
