

**NIGDE ÖMER HALİSDEMİR  
UNIVERSITY  
GREENMETRIC  
SUSTAINABLE CAMPUS  
REPORT  
2021**

## **FOREWORD**

In order to make Niğde Ömer Halisdemir University a sustainable campus, Sustainable Campus Commission was constituted in our university in 2022 in accordance with the relevant provisions of the Zero Waste Regulation and Regulation on Increasing Efficiency in the Use of Energy Resources and Energy. One of the first goals of the commission in 2022, which was constituted with a multi-disciplinary approach by the academic and administrative staff working in different fields, was to increase the Greenmetric ranking of the university. UI Greentmetric is a platform where all universities worldwide are ranked by evaluating to what extend they have adopted the sustainability principles and what kind of a campus they have designed and offered to their users in this direction. While Niğde Ömer Halisdemir University has aimed to improve its own ranking over the years, it has also undertaken to represent its country around the world as a duty. In this regard, having completed the inventory, analysis, and synthesis processes to produce systematic, up-to-date, and accurate data, Greenmetric Sustainable Campus Report for 2021 has been prepared for the first time.

I would like to thank our honorable Rector Prof. Dr. Hasan USLU for the moral and financial support within this period and our valuable commission members who contributed with their devoted work.

**Assoc. Prof. Dr. Ece Ümmü DEVECİ**

**Chairman of the NOHU Sustainable Campus Commission**

**PREPARED BY:**

**Niğde Ömer Halisdemir University Sustainable Campus Commission**  
Assoc. Prof. Dr. Ece Ümmü DEVECİ (Chairman)

Prof. Dr. Semiha AKÇAÖZLU (Member)  
Prof. Dr. Fehiman ÇİNER(Member)  
Prof. Dr. Tülay EZER (Member)  
Assoc. Prof. Dr. Orhun SOYDAN (Member)  
Asst. Prof. Ayşe AKBULUT BAŞAR (Member)  
Asst. Prof. Yusuf Kağan DEMİR (Member)  
Asst. Prof. Hidayet DİKİCİ (Member)  
Asst. Prof. Ömer GENÇ (Member)  
Asst. Prof. Tefide KIZILDENİZ (Member)  
Environmental Engineer İbrahim YOKSULABAŞAN (Member)  
Electrical and Electronics Engineer Harun YALÇINDAĞ (Member)

## **CONTENTS**

<b>FOREWORD</b> .....	2
<b>LIST OF TABLES</b> .....	7

<b>1.8. The open space area divided by the total area</b> .....	13
<b>1.9. Total area on campus covered in forest vegetation</b> .....	21
<b>1.10. Total area on campus covered in planted vegetation</b> .....	21
<b>1.11. Total area on campus for water absorption besides the forest and planted vegetation</b> ... .....	22
<b>1.12. Total number of regular students (part time and full time)</b> .....	22
<b>1.13. Total number of online students (part time and full time)</b> .....	22
<b>1.14. Total number of academic and administrative staff</b> .....	22
<b>1.15. Estimated annual total population</b> .....	22
<b>1.16. Total open space area divided by total campus population</b> .....	22
<b>1.17. University's total budget (in US Dollars)</b> .....	23
<b>1.18. University's budget for sustainability efforts (in US Dollars)</b> .....	23
<b>1.19. Percentage of university budget for sustainability efforts</b> .....	23
<b>1.20. Percentage of operation and maintenance activities of buildings within a year</b> .....	24
<b>1.21. Campus facilities for disabled, special needs and or maternity care</b> .....	24
<b>1.22. Security and safety facilities</b> .....	27
<b>1.23. Health infrastructure facilities for students, academics and administrative staff's     wellbeing</b> .....	27
<b>1.24. Conservation: plant, animal and wildlife, genetic resources for food and agriculture     secured in either medium or long-term conservation facilities</b> .....	27
<b>2. ENERGY AND CLIMATE CHANGE</b> .....	28
<b>2.1. Use of Energy efficient appliances</b> .....	28
<b>2.2. Total campus smart building area (m<sup>2</sup>)</b> .....	28
<b>2.3. Smart Building implementation (percentage of the total floor area of smart building to the     total all floors building area (smart and non-smart buildings area))</b> .....	28
<b>2.4. Number of renewable energy sources in campus) (solar energy, wind energy, etc.)</b> .....	29
<b>2.5. Please specify renewable energy sources on campus and provide capacity produced in     kilowatt hour.</b> .....	29

<b>2.6. Electricity usage per year (in kilo watt hour) .....</b>	29
<b>2.7. Total electricity usage divided by total campus population, kWh per person) .....</b>	29
<b>2.8. The ratio of renewable energy production divided by total energy usage per year .....</b>	29
<b>2.9. Elements of green building implementation as reflected in all construction and renovation policies.....</b>	29
<b>2.10. Greenhouse gas emission reductions program .....</b>	36
<b>2.11 Please provide the total carbon footprint (CO<sub>2</sub> emission in the last 12 months, in metric tons) .....</b>	37
<b>2.12. Total carbon footprint divided by total campus' population, metric tons per person)....</b>	37
<b>2.13. Number of innovative program(s) in energy and climate change.....</b>	38
<b>2.14. Impactful university program(s) on climate change .....</b>	38
<b>3. WASTE .....</b>	39
<b>3.1. Recycling program for university's waste.....</b>	39
<b>3.2. Program to reduce the use of paper and plastic on campus.....</b>	39
<b>3.3. Organic waste treatment.....</b>	40
<b>3.4. Inorganic waste treatment .....</b>	41
<b>3.5. Toxic waste handled .....</b>	44
<b>3.6. Sewerage disposal .....</b>	45
<b>4. WATER.....</b>	48
<b>4.1. Water conservation program implementation.....</b>	48
<b>4.2. Water recycling program implementation.....</b>	49
<b>4.3. Use of Water efficient appliances .....</b>	49
<b>4.4. Treated water consumed.....</b>	50
<b>4.5. Water pollution control in campus area.....</b>	50
<b>5. TRANSPORTATION .....</b>	51
<b>5.1 Number of Registered Vehicles Actively Used in the Campus (NAV).....</b>	52
<b>5.2 Average Number of Vehicles Entering the University on daily basis (ANDV).....</b>	52
<b>5.3 Average Number of Motorcycles Entering the University on daily basis (ANDM) .....</b>	53
<b>5.4 Number of Vehicles divided by the Population of the Campuses (TR.1) .....</b>	54
<b>5.5 Shuttle Service (TR.2) .....</b>	54
<b>5.6 Number of shuttle services serving in the campus.....</b>	55
<b>5.7 Average Number of Shuttle Passengers Serving in the Campus.....</b>	55
<b>5.8 Total journeys of each service every day.....</b>	56
<b>5.9 Zero Emission Vehicle (ZEV) Policies on Campus (TR.3) .....</b>	56
<b>5.10 Use of Average Zero-Emission Vehicle on a daily basis.....</b>	57
<b>5.11 Number of ZEVs per person each day on the Campus (TR.4).....</b>	58
<b>5.12 Total Parking Area (m2).....</b>	58
<b>5.13 Parking Areas divided by Total Areas (TR.5) .....</b>	Error! Bookmark not defined.

<b>5.14 Programs for the Last Three Years (2019-2021) Aiming to Limit or Reduce Parking Areas on the Campus (TR.6) .....</b>	59
<b>5.15 Number of Attempts to Reduce Private Vehicles on Campus (TR.7).....</b>	60
<b>5.16 The Assessment of Pedestrian Roads on the Campus (TR.8).....</b>	61
<b>5.17 Average Daily Journey Length of a Vehicle by km (DJL).....</b>	62
<b>6. EDUCATION AND RESEARCH.....</b>	62
<b>    6.1. Number of courses/subjects related to sustainability offered.....</b>	62
<b>    6.2. Total number of courses/subjects offered .....</b>	62
<b>    6.3. Number of sustainability courses divided by total courses/subjects .....</b>	62
<b>    6.4. Total research funds dedicated to sustainability research (in US Dollars) (average per annum over the last 3 years).....</b>	91
<b>    6.5. Total research funds (in US Dollars) (average per annum over the last 3 years). ....</b>	91
<b>    6.6. The ratio of sustainability research funding to total research funding .....</b>	92
<b>    6.7. Number of scholarly publications on sustainability .....</b>	92
<b>    6.8. Number of events related to sustainability.....</b>	104
<b>    6.9. Number of student organizations related to sustainability.....</b>	105
<b>    6.10. University-run sustainability website .....</b>	106
<b>    6.11 Sustainability website address (URL).....</b>	106
<b>    6.12. Sustainability report.....</b>	106
<b>    6.13. Number of cultural activities on campus.....</b>	106
<b>    6.14. Number of university program(s) to improve teaching and learning.....</b>	109
<b>    6.15. Number of sustainability community services project organized and/or involving students.....</b>	109
<b>    6.16. Number of sustainability-related startups .....</b>	111

## **1. SETTING AND INFRASTRUCTURE**

Niğde Ömer Halisdemir University consists of 6 campuses with a total area of 5.038,341 m<sup>2</sup>: Central Campus, Aşağı Kayabaşı Campus, BESYO campus, Derbent Campus, Bor Campus and Ulukışla Campus. Except for the campuses in Bor and Ulukışla districts, 4 campuses are in the province of Niğde. Our university continues its education-training and research-development activities with 13 Faculties, 2 Schools, 1 State Conservatory, 4 Institutes, 6 Vocational Schools and 15 Research and Application Centers. Photographs showing the university campuses are below. See. Figure 1-2-3-4-5-6)

***Figure 1. Niğde Ömer Halisdemir University Main Campus***

***Figure 2. Niğde Ömer Halisdemir University Aşağı Kayabaşı Campus***

**Figure 3.** Niğde Ömer Halisdemir University Derbent Campus

**Figure 6. Niğde Ömer Halisdemir University Ulukışla Campus**

**1.1. Type of higher education institution**

Comprehensive

**1.2. Climate**

Semiarid

**1.3. Number of Campus Site**

6

**1.4. Campus Setting**

Urban

**1.5. Total Campus Area (m<sup>2</sup>)**

5.038.341 m<sup>2</sup>

**1.6. Total Campus Ground Floor Area of Buildings (m<sup>2</sup>)**

82.866 m<sup>2</sup>

**1.7. Total campus buildings area (m<sup>2</sup>)**

350.831 m<sup>2</sup>

**1.8. The open space area divided by the total area**

After the determination of the area distribution of the land cover of Niğde Ömer Halisdemir University campuses, it was decided in which class the land cover type would be evaluated in order to be able find out the rates determined by "UI GreenMetric" commission. The determined classification is given below (see Table 1).

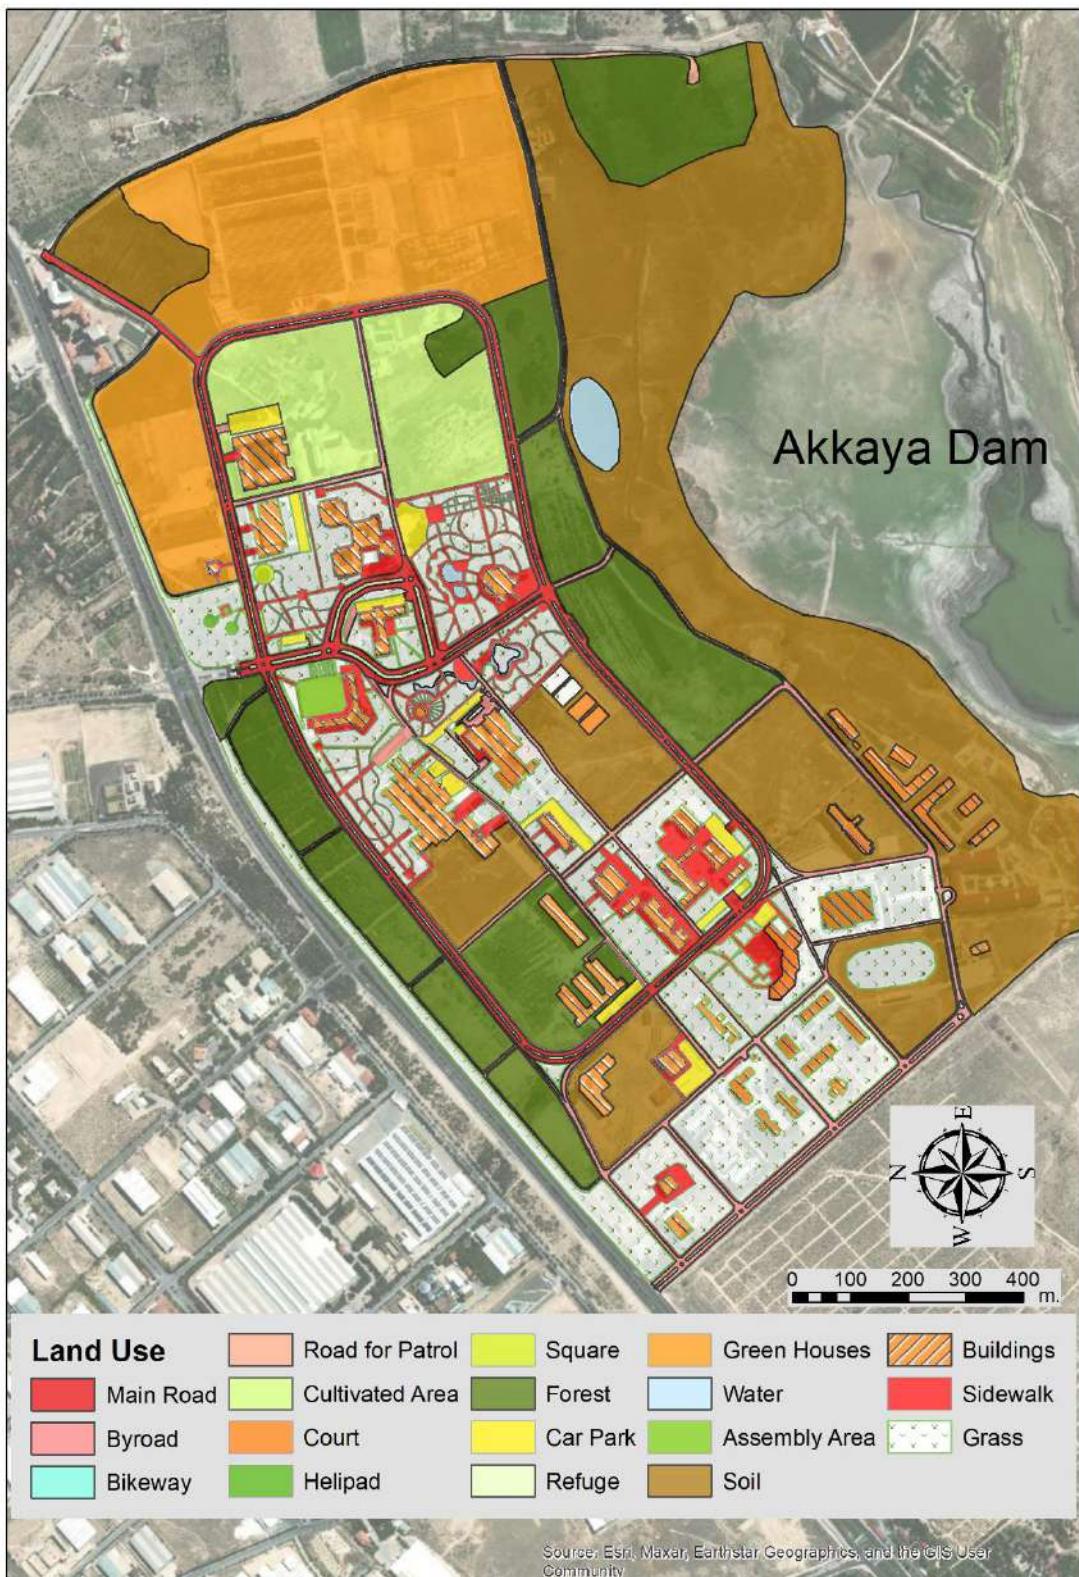

**Table 1. The determined Classification according to UI GreenMetric**

Classification	Land Cover
Open Space Area	<ul style="list-style-type: none"><li>• Cultivated Area</li><li>• Impermeable Surfaces</li></ul>

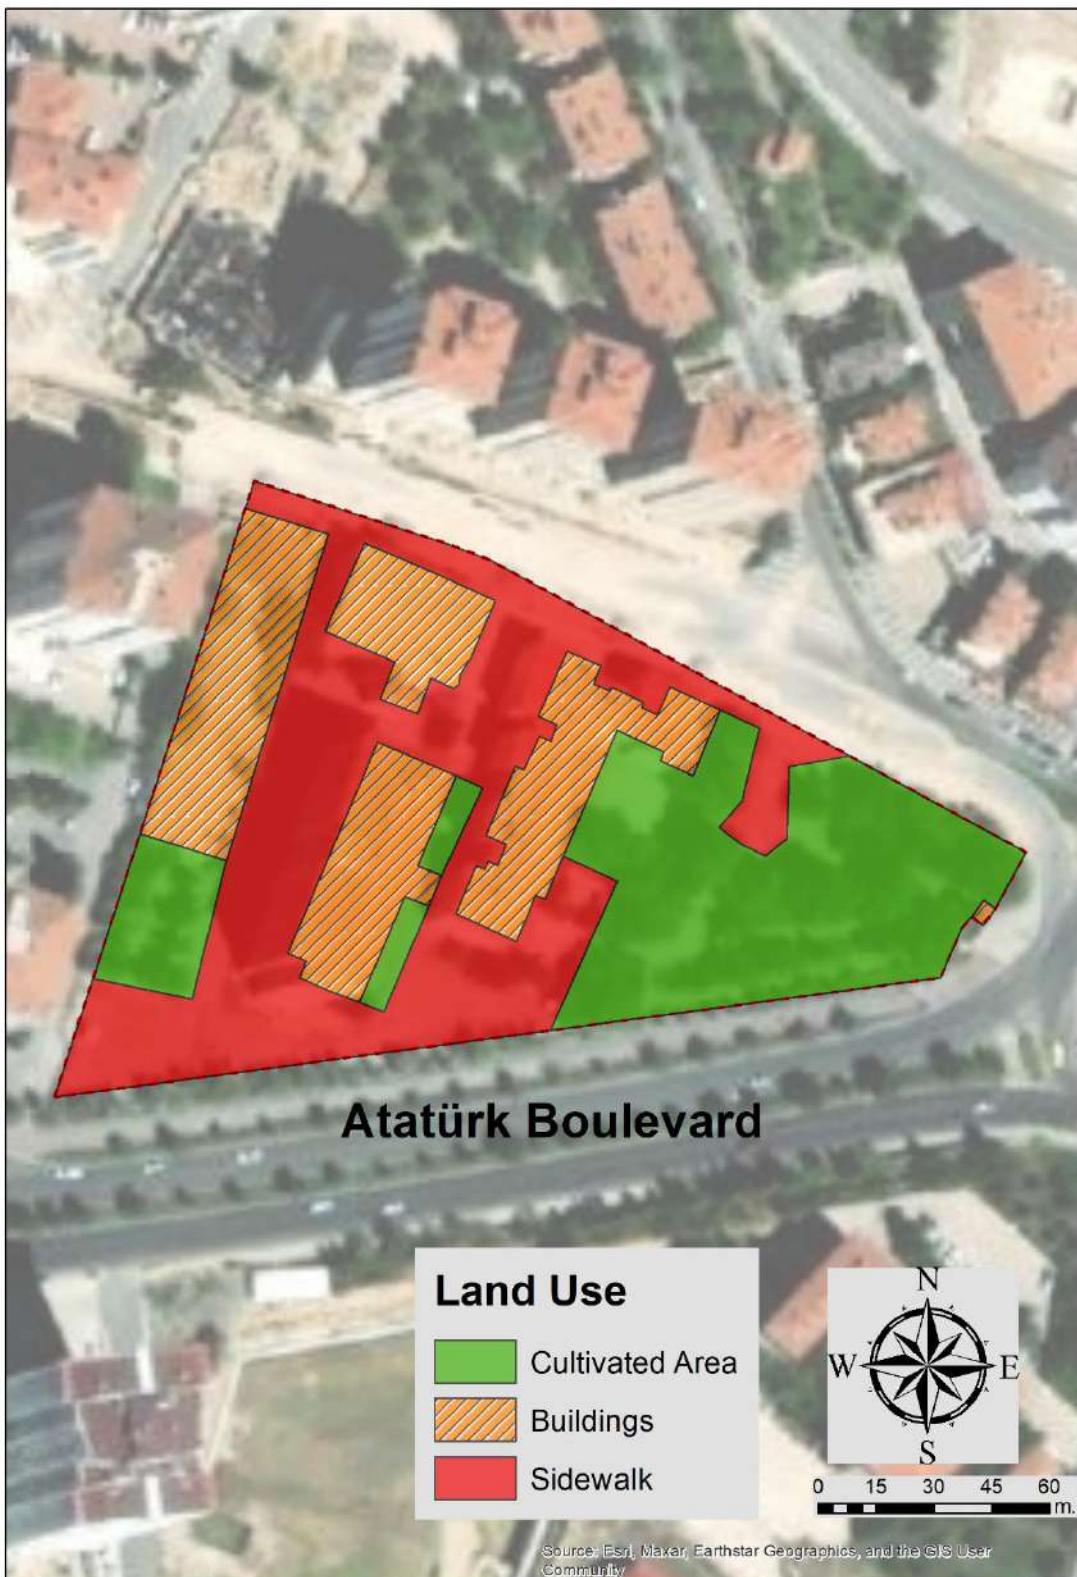

---

	<ul style="list-style-type: none"><li>• Square</li><li>• Assembly Areas</li></ul>
Cultivated Area	<ul style="list-style-type: none"><li>• Grass</li><li>• Cultivated Area</li><li>• Refuge</li><li>• Green houses</li></ul>
Absorber Area	<ul style="list-style-type: none"><li>• Main Road</li><li>• Byroad</li><li>• Bikeway</li><li>• Road for Patrol</li><li>• Square</li><li>• Car Park</li><li>• Assembly Area</li><li>• Sidewalk</li></ul>
Water	<ul style="list-style-type: none"><li>• Water</li></ul>
Forest	<ul style="list-style-type: none"><li>• Forest</li></ul>

**Figure 6. Niğde Ömer Halisdemir University Bor Vocational School Land Use**

**Figure 7. Niğde Ömer Halisdemir University Ulukışla Vocational School Land Use**

The open space areas divided by the total area is given below (see Table 2).

**Table 2. The Open Space Area Divided by the Total Area**

Campus	Total Area (m <sup>2</sup> )	Open Space Area (m <sup>2</sup> )	Total Campus Area	Percent (%)
<u>Central Campus</u>				
<u>Technical Sciences VS</u>				
<u>Social Sciences VS</u>				
Faculty of Sport Sciences	2.730.099,14	5.144.038,88		53,07
Bor VS				
Ulukışla VS				

### 1.9. Total area on campus covered in forest vegetation

Total area on campus covered in forest vegetation is given below (see Table 3).

**Table 3. Total area covered in forest vegetation**

Campus	Area (m <sup>2</sup> )	Total Area (m <sup>2</sup> )
Central Campus	332.018,06	
Technical Sciences VS	-	
Social Sciences VS	-	
Faculty of Sport Sciences	16.993,75	412.262,17
Bor VS	51.305,87	
Ulukışla VS	11.944,49	

### 1.10. Total area on campus covered in planted vegetation

Total area covered in planted vegetation is given below (see Table 4).

**Table 4. Total Area Covered in Planted Vegetation**

Campus	Area (m <sup>2</sup> )	Total Area (m <sup>2</sup> )
Central Campus	782.176,50	
Technical Sciences VS	4.569,26	
Social Sciences VS	-	
Faculty of Sport Sciences	-	3.156.478,81
Bor VS	2.347.534,32	
Ulukışla VS	22.198,73	

**1.11. Total area on campus for water absorption besides the forest and planted vegetation**

Total area for water absorption is given below (see Table 5).

**Table 5. Total Area for Water Absorption**

Campus	Area (m <sup>2</sup> )	Total Area (m <sup>2</sup> )
Central Campus	327.727,39	
Technical Sciences VS	5.740,18	
Social Sciences VS	10.530,11	
Faculty of Sport Sciences	48.581,48	663.037,94
Bor VS	188.924,01	
Ulukışla VS	81.534,77	

**1.12. Total number of regular students (part time and full time)**

23.786 number of students

**1.13. Total number of online students (part time and full time)**

No data.

**1.14. Total number of academic and administrative staff**

1.755 kişi (1042 academic + 713 administrative staff)

**1.15. Estimated annual total population**

25.541

**1.16. Total open space area divided by total campus population**

Demographic data on the campuses has been obtained from Niğde Ömer Halisdemir University Personnel Department (<https://www.ohu.edu.tr/personel>) and Student Affairs Department (<https://www.ohu.edu.tr/oidb>). Total open space areas of the campuses divided by the campus population is given below (see Table 6).

Table 6. Total open space area divided by total campus population

Campus	Total Open Space Area (m <sup>2</sup> )	Total Population	Percent (m <sup>2</sup> )
Central Campus			
Technical Sciences VS			
Social Sciences VS			
Faculty of Sport Sciences	2.730.099,14	25.541	106.89
Bor VS			
Ulukışla VS			

**1.17. University's total budget (in US Dollars)**

294.792.657,00 TL.

**1.18. University's budget for sustainability efforts (in US Dollars)**

Budget for sustainability efforts = 7.909.237,17 TL

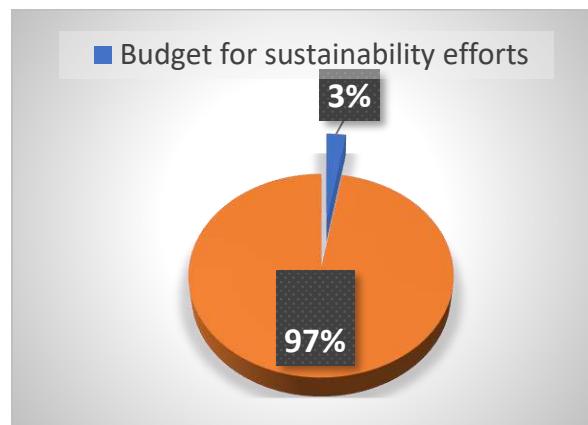

**1.19. Percentage of university budget for sustainability efforts**

The budget items for sustainability efforts are classified in the table below.

**Table 7. Budget items for sustainability efforts**

<b>Budget Type</b>	<b>Budget Amount (TL)</b>
<b>Budget for Projects Supported by BAP</b>	₺4.073.604,00
<b>Garden Supplies Purchases</b>	₺541.641,71
<b>Gardening and Landscape Works</b>	₺59.428,54
<b>Purchase of Goods and Services related to Waste Disposal</b>	₺12.729,00
<b>Building Infrastructure Projects</b>	₺0,00
<b>Major Repairs</b>	₺3.162.581,92
<b>Materials Purchased to Fight Against the Pandemic (disinfectant, etc.)</b>	₺59.252,00
<b>Budget for Health, Culture and Sports</b>	₺0,00
<b>TOTAL</b>	<b>₺7.909.237,17</b>
<b>UNIVERSITY'S TOTAL BUDGET</b>	<b>₺294.792.657,00</b>

University's total budget for 2021 is 294.792.657,00 TL, and the budget allocated for sustainability efforts is 7,909,237,17 TL which is 3% of the total budget.

**Figure 8. Budget for sustainability efforts divided to University's total budget**

## **1.20. Percentage of operation and maintenance activities of buildings within a year**

**Expenditures on operation and maintenance activities of buildings for 2021 are given under the following headings. The percentage of expenditures to the total budget is 1.1%.**

**Table 8. Budget items for operation and maintenance activities of buildings**

<b>Building Infrastructure Projects</b>	<b>₺0,00</b>
<b>Major Repairs</b>	<b>₺3.162.581,92</b>
<b>Materials Purchased to Fight Against the Pandemic (disinfectant, etc.)</b>	<b>₺59.252,00</b>
<b>TOTAL</b>	<b>3.221.833</b>

## **1.21. Campus facilities for disabled, special needs and or maternity care**

Equipment offered for disabled and special needs in our university are presented in the following figures (see Figure 14,15,16,17,18,19). More detailed information can be obtained from the web pages of our university: <https://ohu.edu.tr/engelsizuniversite> , <https://ohu.edu.tr/disabledfirendly> .

## 1.22. Security and safety facilities

The security services of the university provided by the staff.

## 1.23. Health infrastructure facilities for students, academics and administrative staff's wellbeing

There is a training and research hospital of our university in the city center. In addition, there is a family health center in the central campus where emergency and first-step health services are provided.

## 1.24. Conservation: plant, animal and wildlife, genetic resources for food and agriculture secured in either medium or long-term conservation facilities

- Areas of application in the Faculty of Agricultural Sciences and Technologies:
  - Out of 260 decares of land in total,
  - 60 decares for fruit species and varieties for dense planting and traditional production,
  - Establishing vineyards on 30 decares of land in order to preserve local table grape and wine grape,
  - Allocating an area of 60 decares to certified organic production,
  - Allocating an area of 90 decares to field crops production,
  - Allocating 20 decares for research.

- Out of 4 greenhouses with a total size of 1250 m<sup>2</sup>,
- 13 plant growing cabins
- Anadolu Tohumları Student Club
- Climate and Ecology Club
- Herbarium and Museum
- Natural life in the lake
- Campus natural reserves

## **2. ENERGY AND CLIMATE CHANGE**

The climate factor is an important design element in terms of preserving the ecological balance and obtaining qualified spaces. The correct use of climate factors on the formation of buildings on the campuses of our university is important not only for energy efficiency but also for creating healthy spaces for our students and staff.

### **2.1. Use of Energy efficient appliances**

All electronic devices (computers, printers, scanners, etc.) on campus are energy efficient devices. LED lightning fixtures are used in all buildings. Only in old buildings (Rectorship, Faculty of Science and Literature, Economics, Engineering Level 1,2,3; Monument Building; Faculty of Education, Architecture; Library, School of Foreign languages etc.) non-LED lightning fixtures are not mechanical ballasts, but electronic ballasts that provide savings are used.

### **2.2. Total campus smart building area (m<sup>2</sup>)**

Total smart building construction area is 278,126 m<sup>2</sup>.

### **2.3. Smart Building implementation (percentage of the total floor area of smart building to the total all floors building area (smart and non-smart buildings area))**

Smart buildings are structures with integrated mechanisms that meet the changing needs of users more effectively. Our automation systems, which automatically control heating, cooling, air conditioning, lighting, fire and security functions, are available in all buildings, but only not available in the administrative building in BESYO campus.

In addition, in the new buildings (morphology, dentistry, cafeteria, economy, conservatory) fire system, door system, elevator, air conditioning systems, camera systems are connected to automation and the fire system is controlled from the computer. In case of fire, the building, its floor, and place is determined via the program on the computer, and if there is a camera there, the camera image comes to the computer both in the building and in the main security gate where the security staff is available 24/7. Moreover, all our green field irrigation systems are controlled via automation. Lighting automation is available in the indoor gym. There is a remote

monitoring system for the generators in the new buildings (morphology, central research lab, engineering-FEAS). In the building of Teknopark, a developed version of fire automation is used and the upper roof is opened during a fire.

#### **2.4. Number of renewable energy sources in campus) (solar energy, wind energy, etc.)**

Green Energy House, which is powered by solar energy through photovoltaic panels, has been built in the central campus. The building has been available since January 2022. Research on the use of hydrogen energy source is being conducted in the central laboratory.

#### **2.5. Please specify renewable energy sources on campus and provide capacity produced in kilowatt hour.**

There are solar panels in the Solar Energy House with a power of 70kWp. The energy produced is stored in batteries. The capacity of the batteries is 400 kWh. When calculating the batteries, it has been calculated as 5-6 hours of insolation. Considering the winter, it has been calculated as min. 4 hours.  $70 \text{ kWp} * 4 = 280 \text{ kWh}$ . For a year, it is  $280 \text{ kWh} * 365 \text{ days} = 102,200 \text{ kWh}$ .

#### **2.6. Electricity usage per year (in kilo watt hour)**

5.847.285 kWh

#### **2.7. Total electricity usage divided by total campus population, kWh per person)**

229kWh

#### **2.8. The ratio of renewable energy production divided by total energy usage per year**

1,8

#### **2.9. Elements of green building implementation as reflected in all construction and renovation policies**

- **Photovoltaic panel**

The Green Energy House was built in our central campus in order to enhance the use of renewable energy sources in our university, to create awareness about energy efficiency in our region and to contribute to raising awareness on energy efficiency in our university. It is aimed to generate electricity from photovoltaic panels in the building.

- **Directivity, building forms, heat insulation**

In Niğde, which has continental climate, preventing heat loss in buildings is an important design criterion, since the winters are cold and snowy. All of the buildings on the campuses of our university have external thermal insulation. In order to reduce the outer shell area of the buildings, rectangular and square-planned four-folded compact structures were built instead of buildings with large-surface areas that has large seating areas. Thus, it is aimed to get maximum

efficiency from the energy used for heating the spaces and to reduce the heat loss in winter. In addition, the large surfaces of the buildings in the central campus (others?) have been placed facing north and south in order to reduce the effect of the northeast wind, which is the prevailing wind blowing the northeast in winter, on the long facades of the buildings. While deaf surfaces and small-sized windows are used on the northern facades of the buildings, large transparent surfaces are used on the southern facades in order to benefit from the solar radiation in the most efficient way (Figure Layout plan, showing the prevailing wind).

**Figure 15. Main Campus Layout Plan**

- **Natural air conditioning**

In all of the buildings in our university, natural air flow is provided inside the buildings with the help of openable sash windows on opposite facades and artificial air conditioning devices are not used for cooling in summer. Images of the buildings with the principle of natural air conditioning which aims to prevent heat gains, are given (Figure 21-47).

- **Natural lighting**

The principle of natural lighting has been considered in all buildings of education, social facilities and sports facilities on the campuses of our university. With the help of windows with large surfaces used in places that are potentially utilized by many users such as classrooms, offices, laboratories and workshops, there is no need to use artificial lighting during daytime. The windows used in all buildings are double-glazed with thermal insulation, preventing heat loss in cold season and conductive heat gain in hot season.

The circulation areas in the buildings of the Faculty of Communication, Faculty of Islamic Sciences, Faculty of Fine Arts, Faculty of Engineering, Faculty of Agricultural Sciences and Technologies are designed to receive natural light from the roof and facade (Figure 48, Figure 49).

*Figure 43. Faculty of Agricultural Sciences and Technologies circulation areas, lighting from the roof*

*Figure 44. Indoor Sports Complex, indoor natural lighting*

- Humidification with the help of plant groups

The grassed and vegetated areas in the immediate vicinity of the buildings on the campus humidify the dry air in summer and reduce the effect of urban heat island. Evergreen trees used outdoors, and around pedestrian walkways make shady areas and reduce undesirable temperature increases in summer (Figure 50, Figure 51). The evergreen trees and low-growing plants act as windbreaks in cold seasons and increase the comfort conditions in open areas.

Açık mekanlarda ve yaya yollarının çevresinde kullanılan yaprak dökmeyen ağaçlar gölge alanları yaratarak yaz aylarında istenmeyen sıcaklık artışlarını aşağı çekmektedir (Şekil 50, Şekil 51). Sürekli yeşil kalan ağaçlar ve bodur bitkiler soğuk dönemlerde rüzgâr kırıcı vazifesi görerek açık alanlarda konfor koşullarını artırmaktadır.

*Figure 45. Main campus, evergreen trees and plants*

## **2.10. Greenhouse gas emission reductions program**

The academic publications in our university that are the outputs of the studies related to drought are listed below.

- 1- Kizildeniz, T., Movila, M., Bettoni, M. M., Abdullateef, S., & Candar. (2022). Grapevine Propagation Method with Two Temperature Controlling Process, Viticulture Studies (VIS).
- 2- Kizildeniz, T., Pascual, I., Irigoyen, J. J., & Morales, F. (2021). Future CO<sub>2</sub>, warming and water deficit impact white and red Tempranillo grapevine: photosynthetic acclimation to elevated CO<sub>2</sub> and biomass allocation. *Physiologia Plantarum*.
- 3- Hesağ, F., Kizildeniz, T. (2021). Nanopestisitlerin Sürdürülebilir Tarımsal Üretimdeki Rolü. Sustainable Agricultural Management in a Changing World. Iksad Publications. 1 ISBN:978-625-7636-45-2, 302-313.
- 4- Kizildeniz, T. (2021). Dikey Tarım Uygulamaları Sustainable Agricultural Management in a Changing World. Iksad Publications. 1 ISBN:978-625-7636-45-2.
- 5- Unal, Z., Kizildeniz, T. (2021). Smart Agrilculture Practices in Potato Production. the book Potato Production Worldwide, the chapter “Smart Agriculture Practices in Potato Production”, Prof. Mehmet Emin Caliskan, Chief Editor for the book, publisher Elsevier Inc.
- 6- Kızıldeniz, T., Aydın, T.K., Göler, S., Tuna, B. (2021). Effects of Climate Change on Wheat Production in Turkey. Engineering and Architectural Science: A Multidisciplinary Approach. Literatürk academia. ISBN:978-625-7606-08-0, 153-158.
- 7- Kızıldeniz, T., Şakır, G. (2021). Dynamic of Climate Change and Epidemics Affecting Food Security. Engineering and Architectural Science: A Multidisciplinary Approach. Literatürk academia. ISBN:978-625-7606-08-0, 160-167.

In 2021, the following studies have been carried out in order to study the factors of climate change, including drought:

- 1- “UZAY-PaFa: Uzaktan Algılama ve Yapay Zekâ Teknolojileri Kullanılarak Arazide Bitki Sağlığı Tespiti: Patates ve Fasulye Örneği”
- 2- “Niğde’de Tarımda Yeni Dijital Teknolojilerin Uygulama Kapasitesini Geliştirme”
- 3- “Niğde İklim Koşullarında Çilek Çeşitlerine Uygulanacak Farklı Sulama Düzeyleri ve Aralıklarının Verim ve Kalite Parametrelerine Etkisinin Araştırılması”
- 4- “TGT 2021/5-HİDEP Yüksek CO<sub>2</sub> konsantrasyonu ve yüksek sıcaklık olmak üzere iklim değişikliğinin etkilerini iki yerli yonca (*Medicago sativa* L. cv. Bilensoy 80 ve Nimet) çeşidine büyümeye, su durumu ve verimi üzerindeki etkileri”

**2.11 Please provide the total carbon footprint (CO<sub>2</sub> emission in the last 12 months, in metric tons)**

5026

**2.12. Total carbon footprint divided by total campus' population, metric tons per person)**

CO<sub>2</sub> (electricity) = (KwHel/ 1000) \* 0.84 = (5847285 KwH/1000) x 0.84 = 4911,7 metric ton

CO<sub>2</sub> (Bus)= (58\*2\*3,4\*240/100) \*0.01=94,7 metric ton

CO<sub>2</sub> (cars) = (297\*2\*3,4\*240/100)) \* 0.02 = 96,2 metric ton

$\text{CO}_2 \text{ (motorcycle)} = (52 \times 2 \times 3,4 \times 240) / 100 \times 0,01 = 8,5 \text{ metric ton}$

$\text{CO}_2 \text{ (total)} = (4911,7 + 9,47 + 96,2 + 8,5) = 5025,9 \text{ metric ton}$

Karbon ayak izi = toplam emisyon/ toplam kampüs nüfusu

$$= (5026 / 25541) = 0,196$$

## **2.13. Number of innovative program(s) in energy and climate change**

In order to save energy and paper by utilizing technological opportunities while conducting the academic and administrative works, the following practices have been implemented:

- distance education and online exams
- online meetings
- Providing tablets
- cloud services - new software has been received (TEAMS, MERGEN)
- EBYS has been allowed also outside the campus
- Studies on climate change have been announced on the webpage:  
<https://www.ohu.edu.tr/climatechange>
- A short course on climate change and plant modeling for international master's degree:  
<https://www.ohu.edu.tr/climatechange/sayfa/crop-modelling-course>

## **2.14. Impactful university program(s) on climate change**

- Climate change and drought studies were carried out in 2021 within the body of Niğde Ömer Halisdemir University, Faculty of Agricultural Sciences and Technologies.
- Undergraduate and graduate courses on Climate Change:
  - Undergraduate courses: BSM4041 Climate Changes  
([https://www.ohu.edu.tr/akts/bilgipaketi\\_dersdetay/1/BSM4041/dersbilgi](https://www.ohu.edu.tr/akts/bilgipaketi_dersdetay/1/BSM4041/dersbilgi))
  - Graduate courses:  
BUT6143 Uygulamalı Zaman Serisi Analizi  
([https://www.ohu.edu.tr/akts/bilgipaketi\\_dersdetay/1/BUT6143/dersbilgi](https://www.ohu.edu.tr/akts/bilgipaketi_dersdetay/1/BUT6143/dersbilgi))  
BUT6132 İklim Değişikliği ve Tarım  
([https://www.ohu.edu.tr/akts/bilgipaketi\\_dersdetay/1/BUT6132/dersbilgi](https://www.ohu.edu.tr/akts/bilgipaketi_dersdetay/1/BUT6132/dersbilgi))  
BUT7113 Kuraklık Analizi  
([https://www.ohu.edu.tr/akts/bilgipaketi\\_dersdetay/1/BUT7113/dersbilgi](https://www.ohu.edu.tr/akts/bilgipaketi_dersdetay/1/BUT7113/dersbilgi))  
BUT7122 Tarım ve Çevre Konularında Simülasyon  
([https://www.ohu.edu.tr/akts/bilgipaketi\\_dersdetay/1/BUT7122/dersbilgi](https://www.ohu.edu.tr/akts/bilgipaketi_dersdetay/1/BUT7122/dersbilgi))  
PPT7121 Drought Analysis  
([https://www.ohu.edu.tr/akts/bilgipaketi\\_dersdetay/2/PPT7121/dersbilgi](https://www.ohu.edu.tr/akts/bilgipaketi_dersdetay/2/PPT7121/dersbilgi))  
PPT7126 Simulation in Agriculture and Environment  
([https://www.ohu.edu.tr/akts/bilgipaketi\\_dersdetay/2/PPT7126/dersbilgi](https://www.ohu.edu.tr/akts/bilgipaketi_dersdetay/2/PPT7126/dersbilgi))  
PPT6137 Applied Time Series Analysis

([https://www.ohu.edu.tr/akts/bilgipaketi\\_dersdetay/2/PPT6137/dersbilgi](https://www.ohu.edu.tr/akts/bilgipaketi_dersdetay/2/PPT6137/dersbilgi))

PPT6132 Climate Change and Agriculture

([https://www.ohu.edu.tr/akts/bilgipaketi\\_dersdetay/2/PPT6132/dersbilgi](https://www.ohu.edu.tr/akts/bilgipaketi_dersdetay/2/PPT6132/dersbilgi))

### 3. WASTE

#### 3.1. Recycling program for university's waste

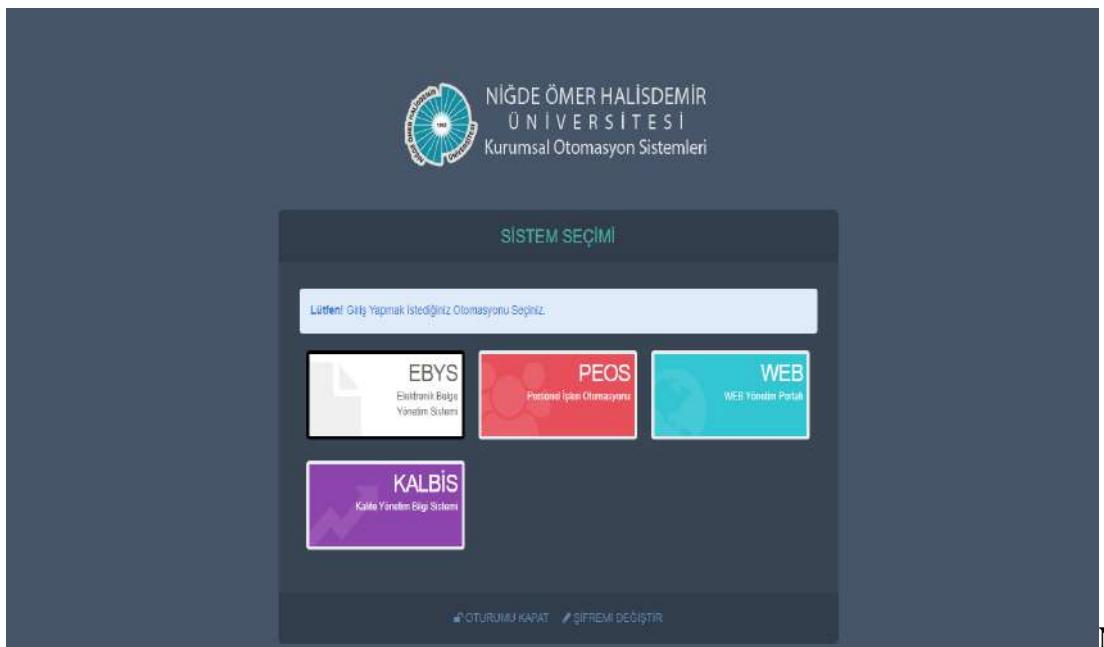

The wastes of Niğde Ömer Halisdemir University are collected separately where they are generated (see Figure 52) and brought to the waste collection center of the university and recycled there.

Figure 47. Waste Recycling Units

#### 3.2. Program to reduce the use of paper and plastic on campus

EBYS (Electronic Document Management System) is used at Niğde Ömer Halisdemir University to reduce the amount of paper used in official correspondence. This practice resulted in 60% reduction in paper consumption.

NOHU

Figure 48. EBYS System Screenshot

### 3.3. Organic waste treatment

Organic wastes generated in Niğde Ömer Halisdemir University are converted into compost at the waste collection center of the university and used for fertilizing the trees in the university.

Figure 49. The Conversion Process of Organic Waste to Compost in the Waste Collection Center-1

**Figure 50. The Conversion Process of Organic Waste to Compost in the Waste Collection Center-2**

**Figure 51. The Conversion Process of Organic Waste to Compost in the Waste Collection Center-3**

### **3.4. Inorganic waste treatment**

Inorganic wastes generated at Niğde Ömer Halisdemir University are collected according to the 6-separation system and then pressed and stored. At the end of the academic year, the stored waste is sold to recycling companies with a tender procedure and recycled in this way.

**Figure 52. Images from NOHU First Class Waste Collection Center-1**

**Figure 53.** Images from NOHU First Class Waste Collection Center-2

**Figure 54.** Images from NOHU First Class Waste Collection Center-3

### **3.5. Toxic waste handled**

At Niğde Ömer Halisdemir University, toxic wastes are collected separately according to their types and then stored. The stored toxic wastes are delivered to authorized companies for recycling or disposal in accordance with the appropriate methods.

**Figure 55. Images from the Collection of Toxic Waste-1**

**Figure 56. Images from the Collection of Toxic Waste-2**

### **3.6. Sewerage disposal**

Sewage wastes of Niğde Ömer Halisdemir University are treated at the biological treatment facility of the university and discharged to Akkaya Dam in accordance with the treatment criteria of T.C. Ministry of Environment, Urbanisation and Climate Change.

**Figure 57. Images from NOHU Sewerage Waste Disposal-1**

**Figure 58. Images from NOHU Sewerage Waste Disposal-2**

**Figure 59. Images from NOHU Sewerage Waste Disposal-3**

## **4. WATER**

The drinking and utility water needs of our campus are supplied from the mains water system of Niğde Municipality. In addition, water is supplied from the groundwater wells on our campus when needed.

### **4.1. Water conservation program implementation**

As for the irrigation of the green areas of the campus, the water obtained by harvesting the rainwater into the pool, where the rainwater in the central campus is collected, seen in the general layout plan (see Figure 65), is used in the irrigation of the parks and gardens. In addition, the water supplied from the mains water system or from the groundwater is used in the irrigation of green areas on the campus with time-adjusted drip or fountain systems according to the need.

**Figure 60. Images from NOHU Water Conservation and Implementation Program -1**

**Figure 61. Images from NOHU Water Conservation and Implementation Program -2**

#### **4.2. Water recycling program implementation**

Not available.

#### **4.3. Use of Water efficient appliances**

A comprehensive water saving program is implemented at Niğde Ömer Halisdemir University. Water saving is implemented by utilizing the appliances such as photocell faucets and photocell urinals in buildings (see Figure 67,68). Water-efficient or sensor-fitted faucets are used in sinks and toilets.

**Figure 62. Image of the Sample Water-efficient Appliance -1**

**Figure 63. Image of the Sample Water-efficient Appliance -2**

#### **4.4. Treated water consumed**

The water obtained by harvesting the rainwater into the pool in the central campus, where the rainwater is collected separately from the sewage water, is used in the irrigation of parks and gardens. With the investments to be made in the coming years, the rate of rainwater harvest will be increased by storing the rainwater to be collected/harvested from the roofs of the buildings on our campus after being filtered.

The evacuated water of the swimming pool in the sports complex on our campus is filtered with a sand filter, and then reused for the irrigation of green areas in and around the Faculty of Islamic Sciences. In addition, rainwater collected in the well located in the garden of the Faculty of Arts and Sciences during the wet season is used for the irrigation of green areas.

#### **4.5. Water pollution control in campus area**

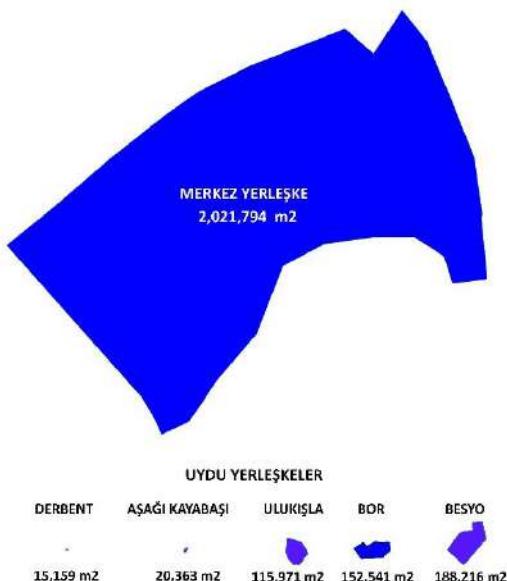

The wastewater from the buildings of Niğde Ömer Halisdemir University, the cafeteria and university's own dormitory are treated at the biological wastewater treatment facility with a capacity of 2100 m<sup>3</sup> per day and then discharged to Akkaya Dam in accordance with the discharge standards of T.C. Ministry of Environment, Urbanisation and Climate Change.

## 5. TRANSPORTATION

Transportation systems play an important role in the levels of carbon emission and pollutant in universities. Transportation policies that limit the number of motor vehicles and encourage the use of shuttle services and bicycles on campus are necessary to reduce the emissions caused by transportation on campus.

Niğde Ömer Halisdemir University has made it a priority to be eco-friendly and to reduce its carbon footprint by adopting a campus policy that assure pedestrian policy, encouraging the student and staff to move around the campus and minimize the use of private vehicles.

Niğde Ömer Halisdemir University provides education and training services in five satellite campuses, except for the central campus which has the largest area. In Figure 69, the areas of the central campus and satellite campuses are shown in scale.

**Figure 64. Comparison of Areas of NOHU Main and Satellite Campuses**

The Derbent campus is the smallest campus and it is located in the city center. The campus is close to the city center and to the public transport stops. Since the distance between the buildings is close, only pedestrian traffic is available. The distance by car from main gate to the parking areas is short.

Aşağı Kayabaşı Campus has similar features to Derbent campus. Although it is larger in area, the average distance between the campus gate and the parking spaces is short (65 m).

Ulukışla Campus is the most distant satellite campus to the central campus. All buildings are within walking distance. Limited parking spaces are available for the staff. Mobility within the campus is provided only by pedestrian transportation.

The Bor campus is the 4th largest satellite campus in terms of surface area. It is close to the center of Bor District. Mobility within the campus is provided only by pedestrian transportation.

The BESYO campus is the satellite campus with the highest surface area and it is located on the Bor-Niğde road. The campus consists of sports complexes and educational buildings. Mobility within the campus is provided similarly by pedestrian transportation.

The Main Campus, with an area of nearly two million square meters, is the campus where transportation mobility is the most due to the number of buildings and facilities where the education-training-research activities of the university are carried out and the number of staff. Mobility is provided by pedestrian transportation, bicycle, private vehicle, and shuttle services.

**Table 10 indicates the area of the campuses and the types of transportation for the mobility.**

**Table 10. The area of the campuses and types of transportation**

Name of the Campus	Area (m <sup>2</sup> )	Ratio to the Main Campus Area	Ratio to the Total Area	Mobility Within the Campus
Derbent Campus	15,159	1%	1%	Pedestrian
Aşağı Kayabaşı Campus	20,362	1%	1%	Pedestrian
Ulukışla Campus	115,971	6%	5%	Pedestrian
Bor Campus	152,541	8%	6%	Pedestrian
BESYO Campus	188,216	9%	7%	Pedestrian
Main Campus	2,021,794	100%	80%	Pedestrian, Bicycle, Shuttle Service, Private vehicle

### **5.1 Number of cars actively used and managed by the university (NC)**

It is the inventory of vehicles with internal combustion engines owned or operated by the university. This number will then be added to the average number of vehicles per day. The number of vehicles registered in the university common pool is 31, and the number of vehicles operated by rental is 7.

**Table 11. Number of vehicles registered to the university**

Campus	Number of cars actively used and managed by the university
All campuses	38

### **5.2 Number of cars entering the university daily (NCE)**

In order to calculate NCE, the number of vehicles with internal combustion engines entering the university has been taken into account. The number of vehicles entering the central campuses is kept on daily basis.

Since entry records are not kept in other campuses, daily vehicles have been estimated for other campuses according to the daily vehicle entry per person on the number of students, administrative and academic staff.

Table 12 shows the total number of vehicles and daily averages for January-June 2021. The table also shows the number of registered vehicles in the campuses. Greenmetric suggests

averaging the average daily traffic during the academic and holiday seasons for the NCE calculation. In order to estimate the vehicle entries in other campuses, the NCE value of the Central Campus has been divided by the campus population and the number of vehicles per person has been found out. This value is 0.05 vehicles/day\*person for the main campus.

**Table 12. Vehicle Entering the Main Campus on a monthly basis**

Campus	Number of Vehicles on a monthly basis -2022					
	JANUARY	FEBRUARY	MARCH	APRIL	MAY	JUNE
Monthly Vehicle (vehicle/day)	20001	30038	63247	58247	20756	54901
Number of Days	31	28	31	30	31	30
Daily Vehicle (vehicle/day)	645	1073	2040	1942	670	1830
Average Daily vehicle (vehicle/day)	1343					
Vehicle entry per person (Population coefficient) (vehicle/day*person)	0.05					

Vehicle entries for other campuses have been obtained by multiplying this value with the population of the campus. Since this value is derived from the Main Campus, the NCE value in the university will naturally be equal to the NCE value in the Main Campus. Table 13 shows the vehicle entry estimates for satellite campuses.

**Table 13. NCE Estimates of Satellite Campuses**

	Std.	Adm.	Aca.	total	NCE 0.05*population
Main Campus	15617	545	765	16927	846.4
Derbent Campus	3423	48	98	3569	178.5
Aşağı Kayabaşı Campus	2860	42	55	2957	147.9
Besyo Campus	90	25	33	148	7.4
Bor Campus	1560	38	78	1676	83.8
Ulukışla Campus	237	14	13	264	13.2
Total	23787	712	1042	25541	1277.05

Std.: Student, Adm.: Admininative, Aca.: academic

### 5.3 Number Of motorcycles entering the university daily (NME)

In order to calculate NME, the number of motorcycles with internal combustion engines entering the university has been taken into account. Since the number of motorcycles entering the university campuses cannot be recognized by the system, the counting was carried out on the busiest day, May-Monday, during the peak hours between 8:30 and 9:30 in the morning. Since no data is available for the holiday, data of the holiday period has been found by multiplying data belonging to May by 0.5. Daily traffic has been multiplied by 8 considering the active period lasting eight hours. The NME value for the university was estimated as 140 motorcycles/day. NME estimates have been calculated for other campuses.

**Table 14. Number of Vehicles Entering the Campuses**

CAMPUS	NME (Motorcycle/day)	Population	Population Coefficient (motosiklet/gün*kişi)
Main Campus	90	16927	0.0053
Derbent Campus	19	3569	
Aşağı Kayabaşı Campus	16	2957	
Besyo Campus	1	148	
Bor Campus	9	1676	
Ulukışla Campus	1	264	
Total	136	25541	

#### **5.4 The total number of vehicles (cars and motorcycles with combustion engines) divided by the total campus' population (TR.1)**

Its unit is vehicle/person and this value is used for the Greenmetric criterion of transportation (TR.1). Greenmetric divides this criterion into 5 classes between 0.0045-1.0 (Table 15). The number of vehicles owned and operated by the university has been obtained by dividing the total of the average daily vehicles entering the campus and the average daily number of motorcycles entering the campus by the campus population (Table 16).

Table 15. Greenmetric TR.1 Classification

Greenmetric Classification (vehicle/person)	1	2	3	4	5
	>=1	0.5- 1	0.125- 0.5	0.045- 0.125	< 0.045

**Table 16. Number of Vehicles Per Person**

	Campus Population (2021)				Number of Vehicles (2021)			TR.1 Value	TR.1 Class
	Std.	Adm.	Aca.	Total	NC	NCE	NME		
Main Campus	15617	545	765	16927		846.4	90		
Derbent Campus	3423	48	98	3569		178.5	19

Std.: Student, Adm.: Admininative, Aca.: academic

#### **5.5 Shuttle Service (TR.2)**

It represents the shuttle service offered within the campus. Public transportation service is free within the campuses, and this service is also offered in the campuses where the average walking distance is longer. Since some campuses are small in area, only pedestrian transportation is

available in these campuses. Therefore, these campuses are not included in the shuttle service assessment. The assessment of this criterion is shown in Table 17.

**Table 17. Greenmetric TR.2 criterion**

1	Shuttle service is offered by parties that doesn't belong to the university.
2	Shuttle service is offered by the university or other parties on a regular basis and for a fee.
3	Shuttle service is offered by the university or other parties, some part of the cost is afforded by the university.
4	Shuttle service is offered by the university, regular and free
5	Shuttle service is offered by the university on a regular basis and with zero-emission vehicles, or the use the shuttle service in the campus is not available.

**Table 18 Assesment of Shuttle Service**

	Main Campus	Aşağı Kayabaşı Campus	Besyo Campus	Bor Campus	Ulukışla Campus	Greenmetric Veri Girişи
TR2	1	X	X	X	X	1

### 5.6 Number of shuttle services serving in the campus

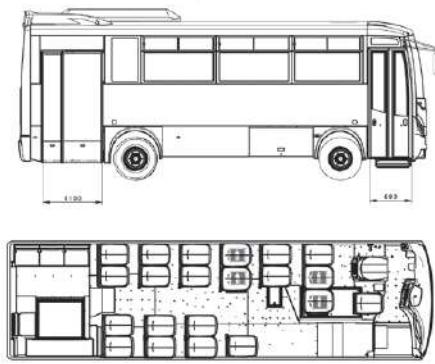

This value shows the number of shuttle vehicles serving in the campus. This assessment has been made for the Main Campus because of the fact that only pedestrian mobility is available on the satellite campuses. Shuttle service is provided by the Line Campus A-Niğde Evleri. The number of vehicles serving in this line is 15.

**Table 19. Number of shuttle services operating on the campus**

	Main Campus	Aşağı Kayabaşı Campus	Besyo Campus	Bor Campus	Ulukışla Campus
TR2	15	0	0	0	0

### 5.7 Average number of shuttle passengers serving in the campus

This value represents the number of passengers served within the campus during a trip. Greenmetric accepts the number of seats of the shuttle services as a reference value while calculating this value. The public transportation vehicles that offer shuttle services within the Main Campus are the brand of Otokar and the seat capacity is 24 people (Figure 70).

**Figure 65. The Shuttle Service, the brand of Otokar**

Evidence: <https://commercial.otokar.com.tr/OtokarTicari/media/Otokar-Ticari/brosur/SULTAN-CITY-EURO6-KS64TK-20-onizleme-new.pdf>

## 5.8 Total journeys of each service every day

Shuttle service is offered by the public transportation system on the Line Campus A-Niğde Evleri according to a timetable (Figure 71). According to this schedule, there is a total of 264 shuttle services during the day.

KAMPÜS A - NİĞDE EVLERİ HATTI SAATLERİ								
06:10	07:40	09:00	11:08	13:16	15:22	16:58	18:36	21:30

**Figure 66.Timetable of the Shuttle Service**

Evidence: <https://www.nigde.bel.tr/otobus-saatleri>

## 5.9 Zero emission vehicle (ZEV) policies on campus (TR.3)

This measure assesses the policies regarding the use of zero-emission vehicles on campus. Table 21 shows the evaluation of how the use of vehicles that emit zero emissions, such as bicycles, canoes, snowboards, and electric vehicles are encouraged.

**Table 20. TR.3 Criteria Assessment Table**

#	Requirements for the criteria
1	Zero-Emission Vehicles are not available
2	The use of Zero-Emission Vehicle is not possible or practical
3	Zero-Emission Vehicles are available but not offered by the university
4	Zero-Emission Vehicles are available that are offered by the university and for a fee
5	Zero-Emission Vehicles are available and offered by the university free of fee

**Table 21. Number of ZEV**

	TR.3	Explanation
Main Campus	5	Free bicycle service is offered by the university.
Aşağı Kayabaşı Campus	X	Not considered because only pedestrian traffic is available.
Besyo Campus	X	Not considered because only pedestrian traffic is available.
Bor Campus	X	Not considered because only pedestrian traffic is available.
Ulukışla Campus	X	Not considered because only pedestrian traffic is available.
Greenmetric Data Entry	5	

### 5.10 Use of average zero-emission vehicle on a daily basis

It shows the use of average zero-emission vehicles, personal or university-owned, within the campus. In order to calculate this value, zero-emission vehicles passing through the gate at the peak hour (8:30-9:30) in the morning of May-Monday were counted.

The number of ZEVs counted at the mentioned peak hour in the morning for the campuses is shown in Table 22. For daily traffic, the count within an hour has been multiplied by 8 considering the active period lasting eight hours. ZEV numbers For other campuses has been calculated with the population coefficient in a similar way to the NCE.

**Table 22. Number of ZEV**

	Bic.	Sco.	EV	Oth.	Total	Total Pop.	Pop. Coeff.	TR.4 Value	TR.4 Class
Main Campus	42	0	0	0	42	16927	0.00248		
Derbent Campus	9				9	3569			
Aşağı Kayabaşı Campus	7	0	0	0	7	2957			
Besyo Campus	0	0	0	0	0	148			
Bor Campus	4	0	0	0	4	1676			
Ulukışla Campus	1	0	0	0	1	264			
Total	63				63	25541		0.00247	2

Bic.: Bicycle, Sco: Scooter, EV: Electric Vehicle, Oth.:Other

Evidence:

Bicycle Path

Bicycle infrastructure

Bicycle Park

### **5.11 Number of ZEVs per person each day on the Campus (TR.4)**

The unit of this value, which is obtained by dividing the average daily number of ZEVs by the total population on the campus, is ZEV/person.

**Table 23. Greenmetric TR.4 Classification**

Greenmetric Classification (ZEV/person)	1	2	3	4	5
	$\leq 0.002$	0.002- 0.004	0.004- 0.008	0.008- 0.02	0.02

Table 23 shows the values obtained by dividing the number of ZEVs by the total population and the relevant TR.4 value.

### **5.12 Total ground parking area (m<sup>2</sup>)**

The total area (m<sup>2</sup>) of the parking areas reserved for private cars within the campus will be calculated. Table 24 shows these parking areas belonging to the campuses.

**Table 24. Total Parking Area within the Campus**

Name of the Campus	Total Area m <sup>2</sup>	Parking Area m <sup>2</sup>	Ratio TR.3
Derbent Campus	15159	605	4.0%
Aşağıı Kayabaşı Campus	20362	1189	5.8%
Ulukışla Campus	115971	742	0.6%
Bor Campus	152541	2780	1.8%
BESYO Campus	188216	749	0.4%
Main Campus	2021794	50077	2.5%
Total	2514042	56143	2.2%

### **5.13 The ratio of the ground parking area to total campus area (TR.5)**

Greenmetric accepts these values, which are obtained by dividing the parking areas calculated in 24 by the total campus areas, as TR.5 criteria according to the classification.

**Table 25. Greenmetric TR.5 Classification**

Greenmetric TR.5 Classification	1	2	3	4	5
(%)	11	7- 11	4- 7	1- 4	1

**Table 26. Total Parking Areas on the Campus divided by Total Campus Area**

Name of the Campus	Ratio Parking	TR.5 Entry
Derbent Campus	4.0%	
Aşağı Kayabaşı Campus	5.8%	
Ulukışla Campus	0.6%	
Bor Campus	1.8%	
BESYO Campus	0.4%	
Main Campus	2.5%	
Total	2.2%	4
Greenmetric Data Entry		4

### **5.14 Program to limit or decrease the parking area on campus for the last 3 years (from 2019 to 2021) (TR.6)**

It includes the efforts by the university administration to reduce the parking areas. These efforts must belong to the last three years.

**Table 27. Greenmetric TR.6 classification**

The Assessment of Greenmetric TR.6 Program for Park Area Limitation and Reduction

#	
1	Program is not available
2	Preparation Program (i.e. feasibility study and promotion)
3	Program resulted in less than 10% reduction in parking area
4	Program resulted in a 10-30% reduction in parking area
5	Program resulted in more than 30% reduction in parking space or reducing the parking space

This criterion will be entered as 1 for Greenmetric criteria, because any attempts by the University to reduce parking spaces in the last three years has not been available.

## **5.15 Number of initiatives to decrease private vehicles on campus (TR.7)**

It includes the number of attempts that limit or reduce the number of private vehicles on campus. Car-free days, car-sharing, high parking fees, subway/tram/bus services, bike-sharing, low-fare subscriptions, etc. are accepted as such attempts. The number of attempts is entered as TR.7 criterion according to Table 28.

**Table 28. Greenmetric TR.7 classification**

#	Greenmetric TR.6 Assessment of the Program for Park Area Limitation or Reduction
1	No Attempt
2	1 Attempt is available
3	2 Attempts are available
4	3 Attempts are available
5	More than 3 attempts are available

1-It is obligatory to get a vehicle stamp for entrance to the campus. Vehicle stamps are bought by the students at an annual cost. This practice limits and reduces the use of vehicles on the campus to a large extent.

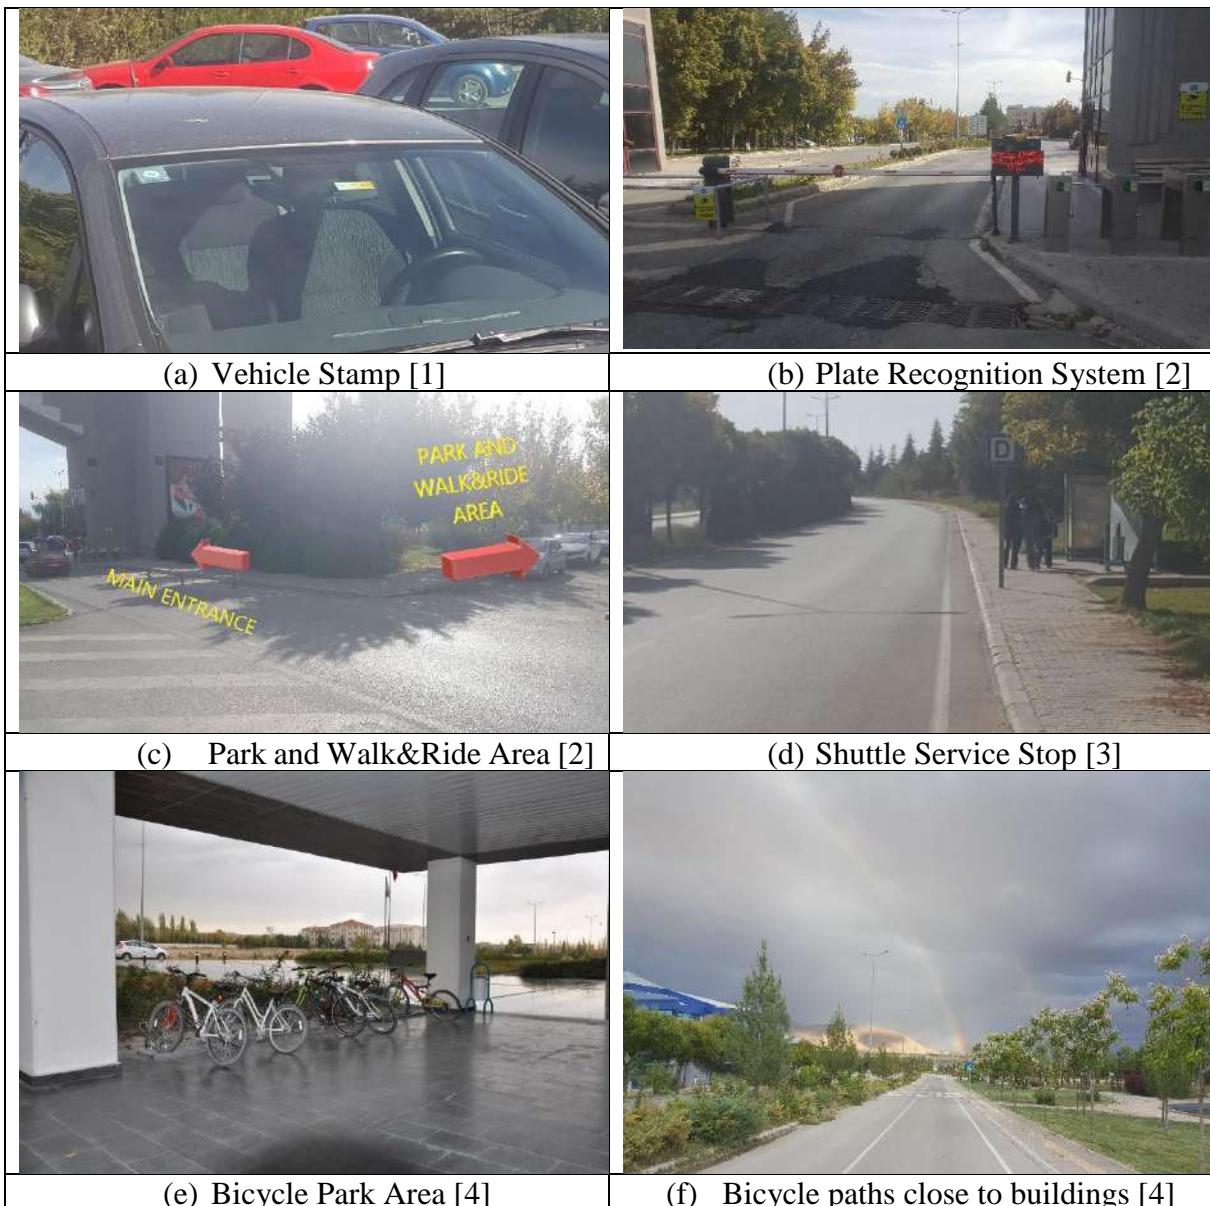

2- Foreign vehicles are restricted for entrance to the campus. Vehicles without reference or not to pass plate recognition system have to park outside the campus drivers have to park and walk or ride with shuttle service.

3- Public transport vehicles allow to get on and get off within the campus for free. This application also serves as a shuttle application because they go in two-way. In this way, the use of vehicles within the campus is reduced.

4- A certain part of the roads with bicycle parks in front of the buildings have been designated as bicycle paths. In this way, the use of bicycles is encouraged, and the use of vehicles is reduced.

For the Greenmetric TR.7 criterion, the value of the university is 5.

Evidence:

## 5.16 Pedestrian path on campus (TR.8)

The condition of pedestrian roads on the campus is classified according to Table 29 and entered as TR.8 criterion.

**Table 29. Greenmetric TR.8 classification**

### # Assessment of Greenmetric TR.8 Pedestrian Roads

1	None
2	Pedestrian roads are available
3	Pedestrian paths are available and designed for safety.
4	Pedestrian paths are available, designed for safety and convenience
5	Pedestrian paths are available, designed for safety and comfort, and disability-friendly features are available in some parts.

The terms safety, convenience, and disability-friendly in the table represent the following situations.

**Safety:** Equipped with adequate lighting, some rails separating vehicles and pedestrian paths

**Convenience:** level difference with a slight slope for walking by the pavement, areas covered with soft (rubber, forests, etc.) material, guiding signs and boards are available for the use of local information

**Disabled-friendly:** Ramps and guiding blocks designed for physically disabled pedestrians

On the campuses, there are some roads that are open only to pedestrians, and there are guide stones for the disabled people. In addition, the sections where vehicle traffic and pedestrian traffic overlap are separated by pedestrian roads and rails. For the Greenmetric criterion, this TR.8 value will be entered as 5.

### **5.17 The approximate daily travel distance of a vehicle inside your campus only (in Kilometers)**

It is the length, by kilometers, of the daily journey of a vehicle (i.e. bus, car, motorcycle) within the campus. For the calculation of this length, the shortest path from the entrance gate to the parking area of each building in the campus has been calculated and its average (1.3 km) has been taken. If it is accepted that a vehicle enters and exits within the university during the day, the average daily journey length of a vehicle within the campus is calculated as 2.6 km.

## **6. EDUCATION AND RESEARCH**

### **6.1. Number of courses/subjects related to sustainability offered**

637

### **6.2. Total number of courses/subjects offered**

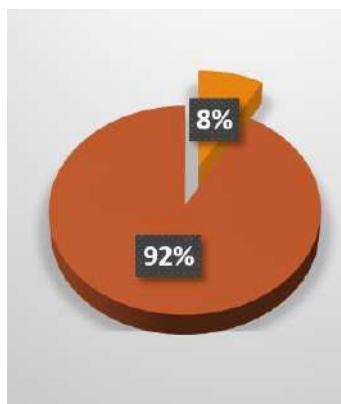

8363

### **6.3. Number of sustainability courses divided by total courses/subjects**

The total number of courses in the 2- and 4-year education programs of NOHU is 8363. 637 of these courses are related to sustainability, which corresponds to 8% of all courses.

**Table 30. Total Number of Courses/Subjects Related to Sustainability by Faculties**

Agricultural Genetic Engineering	<u>Climate Change</u>	3/5	<a href="https://www.ohu.edu.tr/akts/bilgipaketi_dersdetay/1/tgm3025/dersbilgi">https://www.ohu.edu.tr/akts/bilgipaketi_dersdetay/1/tgm3025/dersbilgi</a>

#### **6.4. Total research funds dedicated to sustainability research (in US Dollars) (average per annum over the last 3 years)**

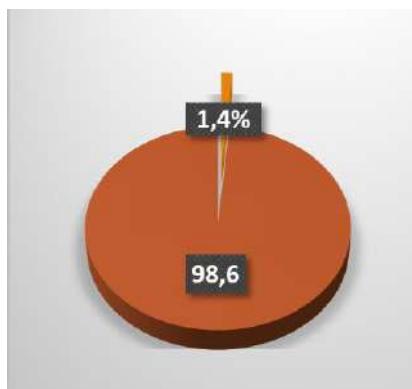

4.073.604,60 TL

#### **6.5. Total research funds (in US Dollars) (average per annum over the last 3 years).**

4.073.604,60 TL

## **6.6. The ratio of sustainability research funding to total research funding**

The total budget of the NOHU Scientific Research Projects Coordination Unit for 2021 is 4,073,604,60 TL. Its ratio to the total budget of the university in 2021 is 1.4%.

**Figure 68. The ratio of sustainability research funding to total research funding**

**Table 42. NOHU Budget Information for 2021**

Treasury Contribution	377.000,00 TL
Transferred from 2020	3.149.836,10 TL
Transferred from Revolving Funds	409.113,00 TL
Non-thesis master's programs	137.655,50 TL
<b>TOTAL Budget for 2021</b>	<b>4.073.604,60 TL</b>

## **6.7. Number of scholarly publications on sustainability**

The number of scholarly publications on sustainability published in 2021 is **161**.

*Table 43. Number of scholarly publications on sustainability by academic units*

Departme nt	Publicatio n Type(Book , article, notice and etc.)	Name of the Writer	Name of the Publication	DOI/ISBN/ISSN

#### **6.14. Number of university program(s) to improve teaching and learning**

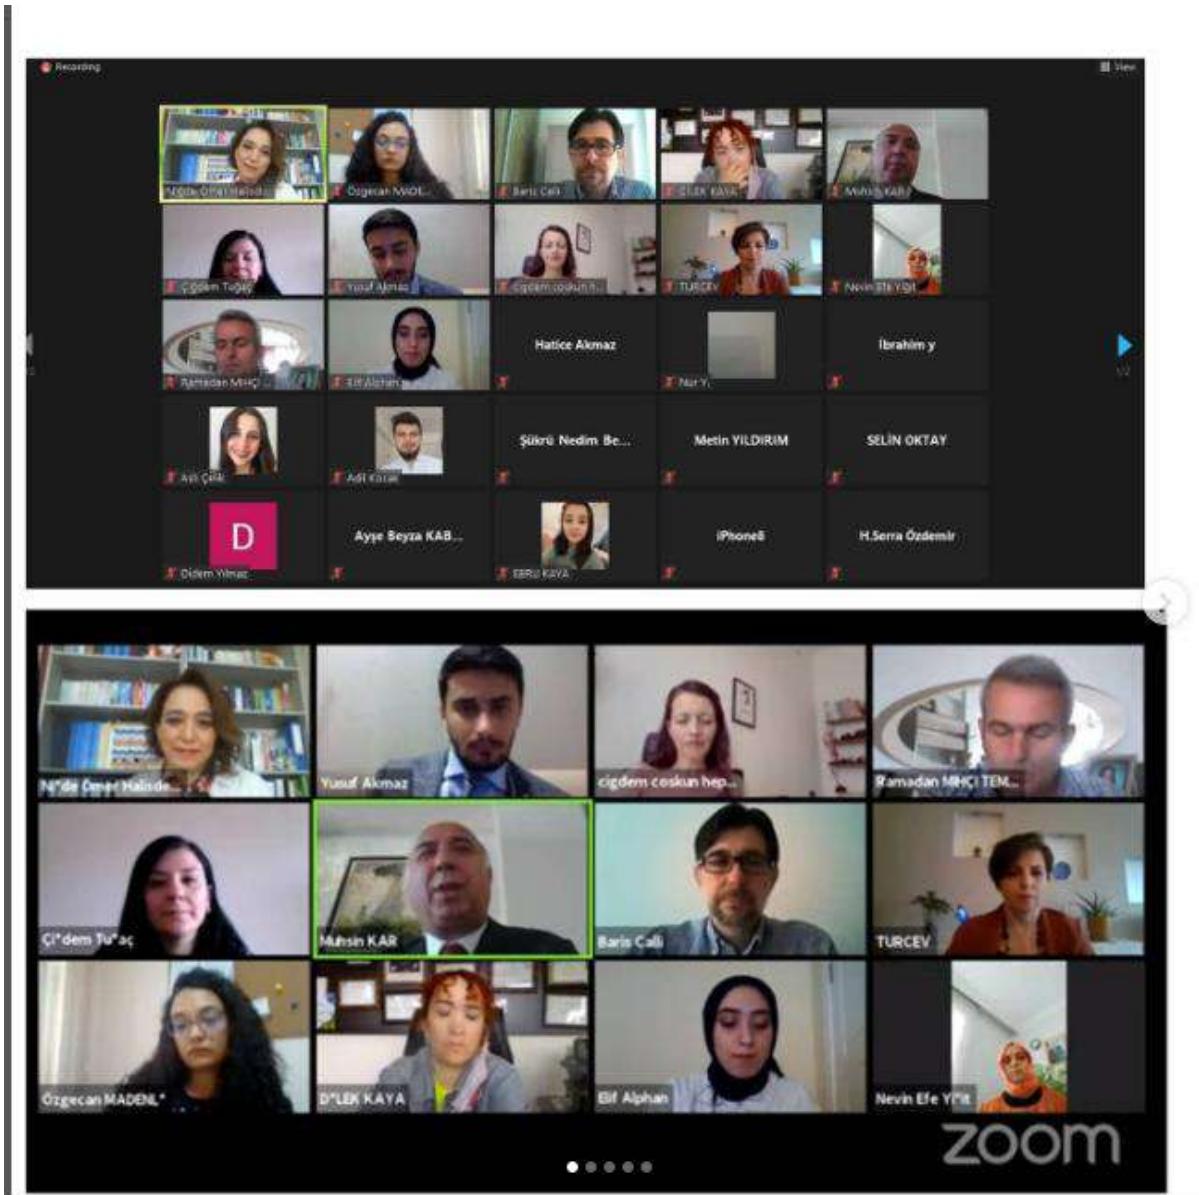

To improve teaching and learning, training and opportunities such as internet-cloud system, quota increase, presentation techniques and program information were provided to academicians.

#### **6.15. Number of sustainability community services project organized and/or involving students**

In the "World Environment Day Interview (Panel)" organized by Atatürk University Environmental Problems Research Center, sharing the experience, information was given about the waste management system and awareness activities in our university (Figure 74). In addition, an online training panel was organized with the participation of our University's Waste Management Coordinator and Zero Waste Club for the "World Environment Day" (Figure 75).

**Figure 69. Atatürk University Environmental Problems Research Center World Environment Day Interview**
